A CRM covering to Manage the Services offered by an Institution

Leading educational brass EduConsultPro Institute provides a range of programs and courses in several subjects. The institute confronts difficulties in in effect handling the admissions process, student inquiries, and professional consultation services as the number of prospective students seeking admission rises year after year. In order to overcome these obstacles, EduConsultPro Institute chooses to use Salesforce CRM to improve the entire undergo for admissions personnel and students by streamlining the admissions process.

The admissions procedure for potential students wishing to sign up for courses and programs provided by EduConsultPro Institute is the main topic of the use case. The objective is to give students a smooth and open go through while allowing

admissions staff to examine quickly and handle student inquiries, case management, and admission diligence.

Index

S.No.	Modules
1.	Requirements
2.	Create Objects from Spreadsheet
3.	Create a ScreenFlow for Student Admission Application process.
4.	Create Users
5.	Create an Approval Process for Property Object
6.	Create a Record Triggered Flow
7.	Create a ScreenFlow for Existing Student to Book an Appointment
8.	Create a ScreenFlow to Combine all the flows at one place
9.	Create a lightning app page

Requirements

1. Admission Application Management:

The institute's website or portal should provide prospective students with access to the admission coating form. A thorough set of data, including personal and Danish history, reservation, and personal details, should be gathered for the entrance application. diligence for admission that have been submitted ought to be recorded and kept in the Salesforce CRM database. Upon successfully submitting their diligence, students ought to receive automated email notice. It should be possible for admissions personnel to create dashboards and reports that examine trends in enrollment, acceptance rates, and applicant metrics.

2. Approval Process Requirements:

To measure and approve consulting requests, implement an approval process in Salesforce. Configure an email display to inform pertinent students of their approval or rejection. Ensure that as soon as a request is created, it is automatically sent.

3. *Management of audience Services:*

Through the institute's website or portal, prospective students ought to be able to make requests for audience services. The student's info, preferred consultation areas, and requisite areas of expertise should all be recorded in the consulting request form. Consulting requests that have been submitted ought to be noted in the Salesforce CRM system. It should be automated for advisors and consultants to receive email telling when new consultation requests are made. Within the Salesforce CRM interface, consultants should be able to view, accept, and handle audience requests. Salesforce should allow for the scheduling of consulting appointments, including the appointment's date, time, and goal. It is important to monitor and change appointment statuses (such as planned, finished, or canceled) in Salesforce.

4. *Immigration Case Management:*

Students should be able to begin immigration cases through the phone, email or web. Relevant data and case specifics should be recorded in the immigration case submission form. Immigration cases that are submitted ought to be tracked down and kept in the Salesforce CRM database. New immigration cases should be automatically notified by email to case managers and immigration agents. Immigration agents should be able to use the Salesforce CRM interface to see, handle, and monitor immigration cases. Tracking and updating case status (such as open, in process, and closed) in Salesforce is recommended.

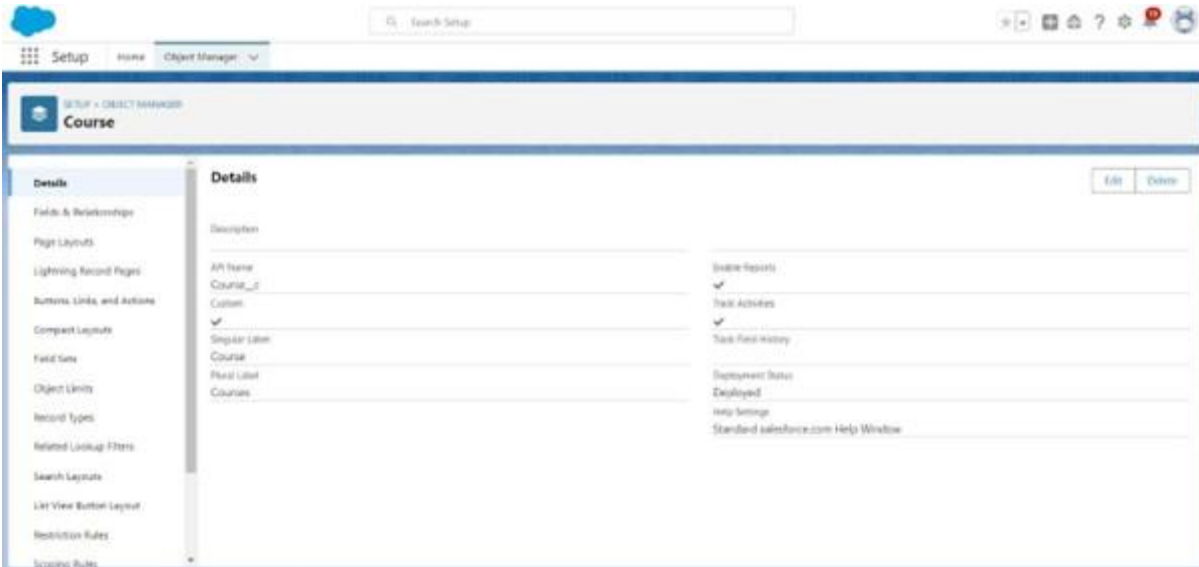

Create Objects from Spreadsheet

The Lightning Object Creator is a tool that makes it easier to create custom objects in Salesforce from spreadsheets. Here is a detailed tutorial on how to accomplish that.

How to Make Personalized Items from a Spreadsheet:

1. Create Course object

- . Select "create object from spreadsheet" in your object manager.
- To obtain the spreadsheet, Course, click the provided link.
- Once the file has been downloaded, upload it, map the fields, and then submit it to create an object.

2. Produce the remaining objects.

- . Take the same actions that we did to create the course object. For the remaining items, use the following sheets.
 1. Consultant
 2. Learner
 3. Scheduling

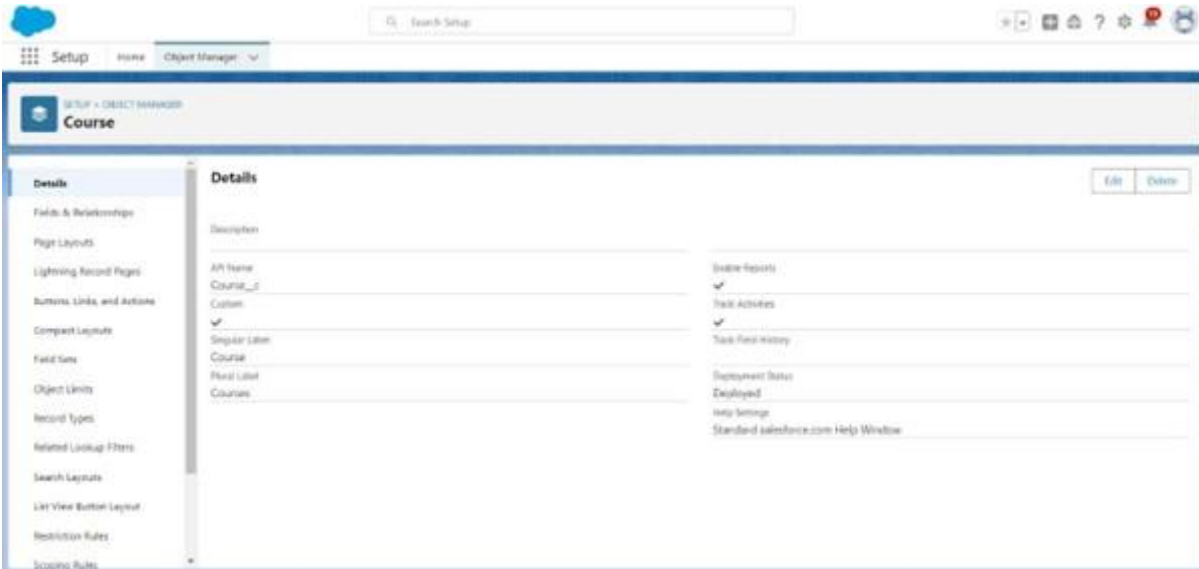

Create Objects from Spreadsheet

The Lightning Object Creator is a tool that makes it easier to create custom objects in Salesforce from spreadsheets. Here is a detailed tutorial on how to accomplish that.

How to Make Personalized Items from a Spreadsheet:

1. Create Course object

- Select "create object from spreadsheet" in your object manager.
- To obtain the spreadsheet, Course, click the provided link.
- Once the file has been downloaded, upload it, map the fields, and then submit it to create an object.

2. Produce the remaining objects.

- Take the same actions that we did to create the course object. For the remaining items, use the following sheets.
 1. Consultant
 2. Learner
 3. Scheduling
- 1.

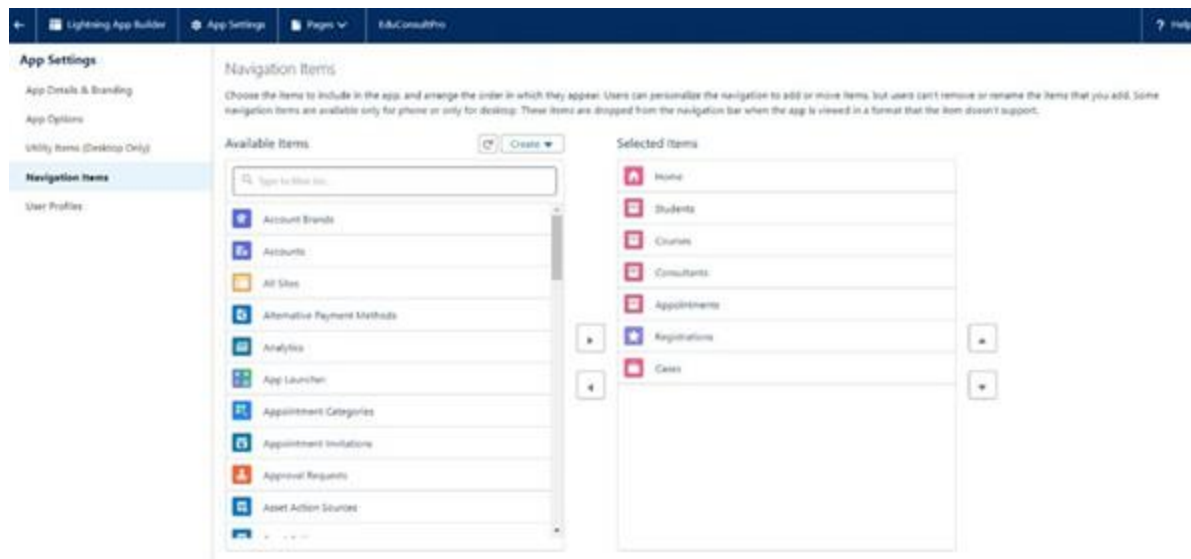

1. Set Up the Case Object

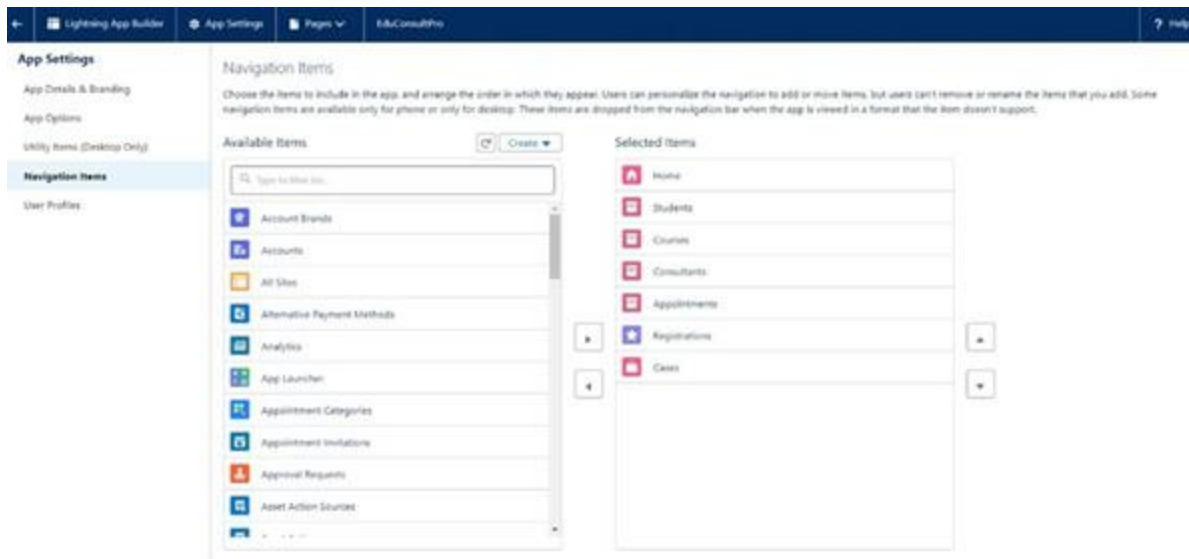

1. Go to object manager, edit case object.
2. Select the "Type" field and add the values in it.
 - Immigration
 - Visa Application
3. Now Select the "Status" field and add the values in it.

Open
In-progress

2. Create a Lightning App

1. Navigate to Setup and use Quick Find to look for the App Manager.
2. Select "New Lightning App."
3. Enter "EduConsultPro" as the app name, then click Next, Next, Next.
4. From the Available Items to the Selected Items, add Home, Students, Courses, Consultants, Appointments, Registrations, and Cases.
5. After selecting the "System Administrator" profile from the list of available profiles, click Save & Finish.

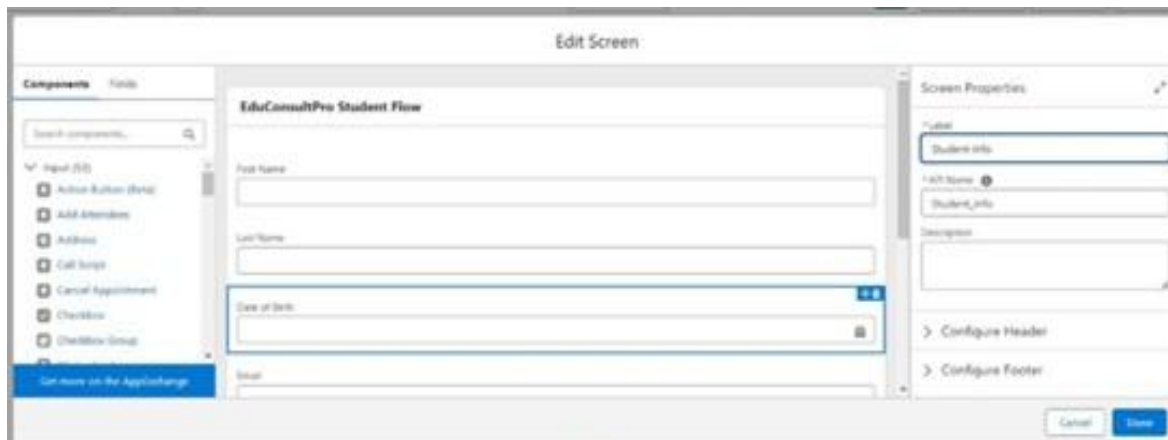

ScreenFlow for Student Admission Application process.

1. Add Screen Element From Setup:

1. Quickly locate Flow Builder, then choose New Flow -> ScreenFlow.
2. Include a Screen component.
3. Enter "Student Info" for Label in the Screen Properties pane.
4. To see every field that is part of the student object, click Fields, then select the record variable input and create a new resource called StudentRecordRes. Drag and drop any field that has to be added to the screen in order to gather student data.

2. Create an element to create a student record.

1. Place a Create element with the label "Create Student Record" after the

Student Info Screen Element.

2. Choose "use all values from a record" under How to Set the record fields and "one" under How many records to create.
3. In the Student Info screen element, select the record variable resource (StudentRecordRes) that we created under Create a record from these values.

3. Insert Screen Feature

1. Once the student record element has been created, add a screen element and name it "course screen."
2. Create a picklist element from the left side panel, name it "Select Course," type "IELTS" into the options, then hit Enter. The variable "IELTS" is created as a result.
3. Do the same with the GMAT, TOEFL, Duolingo, and GRE.

1.

2. Add Decision Element

1. Add a Decision Element after Select Course Screen Element, label it as Selecting Course.
2. Under outcome label it as "Selected IELTS" and write the condition such as below: Resource : Select_Course (Screen Component from Select Course Screen Element) Operator: Equals Value : IELTS (Choice Variable from Select Course Screen Element)
3. Click on the "+" icon and Repeat step 2 for other options mentioned as below: GRE

GMAT

DuoLin

go

TOEFL

Click Done.

3. Add GET Record Element

1. Add a GET Record Element after Decision Element, under the IELTS path and label it as "Get IELTS Rec".

2. Select Object : Course
Condition Requirement : All Conditions are Met(AND)
3. Field : Course Name
Operator : Equals
Value : {!Select_Course
4. Repeat the steps 1 & 2 for the GRE, GMAT, TOEFL, DuoLingo paths.

4. Create Registration Record using Create Records Element

1. Add a Create element after the Get IELTS Rec element and label it as "Create IELTS Registration Rec".
 2. Select "one" under How many records to Create, and select "Use separate resources, and literal values" under How to Set the record fields.
 3. Select Object : Registration
 4. Field :
Course_Name_c
Value :
{!Get_IELTS_Rec.l
d}
 5. Field : Student_Name_c
Value :
{!StudentRecordRes.l
d}
 6. Repeat the steps 1 & 2 for the GRE, GMAT, TOEFL, DuoLingo paths.
1. Click on the toggle toolbox on the left corner, click "New Resource", then select "Text Template" as Resource Type.
 2. Give the API name as "StuRegistrationEmailTextTempBody", select "view as plain text" and paste the below text in body.

"Dear {!StudentRecordRes.Name},

Congratulations and welcome to EduConsultantPro!

We are delighted to inform you that your registration on our platform has been successfully completed. You are now part of our esteemed community dedicated to

empowering students like you to achieve their educational and immigration aspirations. At EduConsultantPro, we understand the importance of your academic and career goals, and we are committed to providing you with the highest level of support and guidance throughout your journey.

Here are a few key points to help you get started:

Explore Our Resources : Take some time to explore the wide range of resources, tools, and services available on the EduConsultantPro platform. From educational insights to immigration advice, we offer comprehensive support tailored to your needs.

Connect with Our Consultants : Our team of experienced consultants is here to assist you at every stage of your educational and immigration endeavors. Don't hesitate to reach out to us with any questions, concerns, or inquiries you may have. We're here to help!

Stay Updated : Keep an eye on your inbox for important updates, announcements, and exclusive opportunities from EduConsultantPro. We'll ensure that you're informed about the latest developments and relevant information to support your journey.

Engage with the Community : Join our vibrant community of students, professionals, and experts who share your passion for education and global opportunities. Connect with like-minded individuals, participate in discussions, and expand your network.

Once again, congratulations on taking this important step towards realizing your academic and career aspirations. We are thrilled to have you as part of the EduConsultantPro family and look forward to supporting you on your journey to success.

If you have any questions or need assistance, please don't hesitate to contact us.

Thank

you." Click

Done.

3. Repeat steps 1 & 2 to create an email text template for the email subject, label it as "StuRegistrationEmailTextTempSub", write a text message in the body and save it.

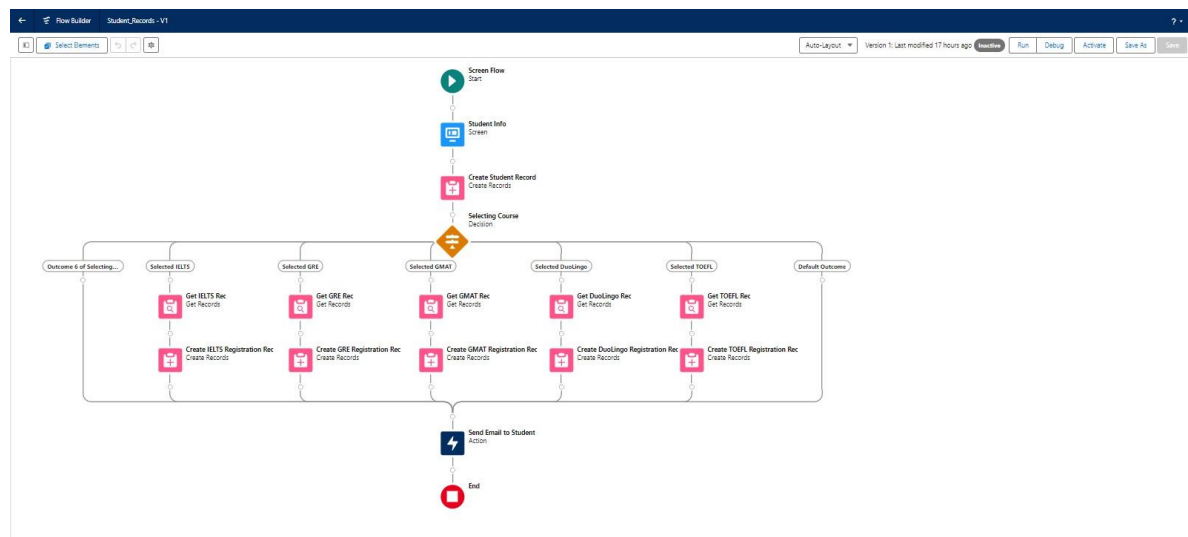

Add an Action Element

1. Add an Action Element after all the Decision paths, label it as "Send Email to Student".
2. Under "Set input values for selected action", include body, Recipient Address List and Subject.
3. For input Body : {!StuRegistrationEmailTextTempBody},

Recipient Address List : {!StudentRecordRes.Email_c},
Subject : {!StuRegistrationEmailTextTempSub}.

Add Screen Element

1. Add a Screen Element after the Send Email to Student Action Element, label it as Success Screen.
2. From the left side panel search for the Display text component and drag it to the main panel, label it as "SuccessMessage".
3. Paste the below in the Resource picker box.
4. Click Done.
5. Save the flow and name it as "EduConsultPro Student Flow". Your flow will look as shown below:

Create Users

Make a user with the user profile of the Standard platform.

User

1. Go to Setup --> Administration --> Users --> New User

2. LastName : Consultant
3. License : Salesforce Platform
4. Profile : Standard Platform User
5. Fill all the mandatory fields & Save.

Configure the User Settings

1. Go to Setup --> Administration --> Users --> click Edit next to your name
2. Scroll down to bottom, under Approver Settings, Select "Consultant" the Manager Field.
3. Click Save.

Approver Settings

Create an Approval Process for Property Object

1. Create an Email Template

1. From Setup, enter Templates in the Quick Find box, and then select Lightning Email Templates, toggle on.

2. go to app launcher, search for "Email Templates", Create a new folder with the desired name.
3. Then create a new email template, select the folder which we have created in the previous steps, enter the below text in the HTML Value and Save it as "Submission Template".

I want to assure you that I am looking forward to our meeting and am fully prepared to address any questions or concerns you may have regarding {{{Appointment_c.PurposeTopic_c}}}. Your success and satisfaction are my top priorities, and I am committed to providing you with the guidance and support you need. If you have any specific topics or questions you would like to discuss during our appointment, please feel free to share them with me in advance. This will help ensure that our time together is as productive and beneficial as possible.

If for any reason you need to reschedule or cancel our appointment, please notify me at your earliest convenience so that we can make alternative arrangements.

Once again, thank you for choosing to work with me on this matter. I am confident that our collaboration will lead to positive outcomes and progress toward your goals.

If you have any questions or require further information before our scheduled appointment, please don't hesitate to reach out to me.

Looking forward to our meeting.

Best regards,

{{{Recipient.Name}}},

EduConsultantPro"

1. Create two more Email templates for Approval and Rejection of Request similar to the previous one.

1.

Create an Approval Process

1. From Setup, enter Approval in the Quick Find box, and then select Approval Processes.
2. In Manage Approval Processes For, select Appointment.
3. Click Create New Approval Process --> Use Jump Start Wizard.
4. Configure the approval process.
 1. Click next and "Next Automated Approver Determined By" --> Select Manager.
 2. From Record Editability Properties --> Click on Administrators OR the currently assigned approver can edit records during the approval process.
 3. Save the approval process.
 4. Click View Approval Process Detail Page.
 5. Under Initial Submission Actions, click Add New --> Field Update, and configure it with these values.

Field	Value
Name	Submitted
Field to Update	Appointment: Status

A Specific value	Pending
------------------	---------

6. click Add New --> Email Alert, and configure it with these values.
 Description : Submission Email Alert
 Unique Name : Auto Populates
 Email Template : Submission Template
 Recipient Type : Select your Name
7. Repeat the Steps 10 - 11 for Final Approval and Final Rejection actions.
- 1.

Create a Record Triggered Flow
